

# Mikhail Kogan

AI Agentic & MCP Platform Engineer | Infrastructure & CI/CD

 **About me**

AI Platform & Agentic Engineer with 10+ years building high-availability systems, from consumer apps (5M+ users) to AI infrastructure.

Creator & Lead Developer of CyberMem – a production-ready, self-hosted MCP memory server that lets multiple LLM clients (Claude, GPT, Cursor, Perplexity) share persistent context.

Expert in multi-platform deployment (Docker, Kubernetes, Helm, Ansible), CI/CD automation (GitHub Actions, GitLab CI, Xcode Cloud), and Zero-Trust networking (Tailscale, Traefik).

Proven leader: **scaled engineering team from 1 → 13, cut release cycles from 2 weeks → 2 days, maintained 99.5–100% uptime in production.**

Experience	Details
<div><div>▼ CyberMem</div><p>Open Source Project: <b>Production-grade, self-hosted MCP</b> (Model Context Protocol) <b>memory server</b> solving AI agent context fragmentation. Enables <b>Claude, ChatGPT, Gemini, and Perplexity</b> to <b>share a single persistent memory</b> with automated <b>multi-platform deployment</b> (macOS, Linux, Raspberry Pi, Kubernetes), <b>real-time observability</b>, and Zero-Trust networking. <a href="#">cybermem.dev</a> / <a href="#">GitHub</a> / <a href="#">NPM</a></p><p><b>Creator &amp; Lead Developer: 2025 — Present</b></p><ul style="list-style-type: none"><li>Designed and built a self-hosted MCP server that allows <b>multiple LLM clients</b> (Claude, GPT, Gemini, Cursor, Perplexity) to <b>share long-term memory and tools</b>, eliminating the “every conversation starts from scratch” problem.</li><li>Implemented per-client remote access policies, <b>observability, and full audit logging</b> for every operation and <b>every MCP client</b> (Claude Desktop, Claude Code, Cursor, etc.) separately.</li><li>Engineered a custom TypeScript CLI and IaC engine that <b>automates complex multi-platform deployment</b> (macOS, Raspberry Pi, Kubernetes clusters) <b>into a single command</b>.</li><li>Built a full observability stack (Vector → Prometheus/Grafana) and a custom dashboard for <b>real-time tracking of AI agent memory per-client usage</b>, latency, and memory health.</li><li>Established an <b>end-to-end testing framework with Playwright</b> to ensure <b>mission-critical stability across updates</b>.</li><li>Validated with <b>complex LangGraph/LangChain multi-agent workflows</b> to ensure context consistency and prevent hallucination during long-running tasks</li><li>Automated CI/CD for the <b>monorepo</b> using GitHub Actions, enabling <b>100% automated multi-platform releases (no manual steps)</b>.</li></ul></div> <div><div>▼ Centerya</div><p>AI CRM platform made by Israeli seed stage startup, designed for real estate agents in the US market.</p><p>📍 <a href="#">Tel Aviv, Israel</a></p><p><b>Founding Engineer &amp; Mobile Infrastructure: 2024 — 2025</b></p><p><b>Centerya iOS App:</b> <a href="https://apple.co/3TuHEJB">https://apple.co/3TuHEJB</a>. A mobile app for AI CRM with support of <b>VoIP calls</b> and <b>Siri Intents</b>.</p><ul style="list-style-type: none"><li><b>Architected and solely delivered</b> an AI-powered iOS CRM application (Centerya) from concept to App Store launch (<b>VoIP, Siri Integrations, App Intents</b>).</li><li>Integrated Twilio SDK to provide <b>VoIP calls with AI-generated call summaries and property suggestions</b> for US real-estate agents.</li><li>Established mobile infrastructure with <b>real-time monitoring</b> (Sentry), <b>centralized logging</b> (AWS CloudWatch), and <b>alerting</b> to keep <b>crash-free sessions above 99%</b>.</li><li>Built and maintained a <b>CI/CD pipeline</b> in Xcode Cloud, enabling <b>automated testing and weekly feature releases</b>.</li><li>Implemented a modular SwiftUI + SwiftPM architecture <b>optimized for caching and startup performance</b>.</li></ul></div> <div><div>▼ Tinkoff Bank</div><p>The <b>largest digital-only bank in Western Europe</b> operated in the Russian market.</p><p>📍 <a href="#">Russia</a></p><p><b>Team Lead — Dolyame iOS platform: 2021 — 2023</b></p><p><b>Dolyame</b> — Russia’s first BNPL (Buy Now, Pay Later) service. Comparable to Klarna (Europe) and Afterpay (US).</p><ul style="list-style-type: none"><li>Launched the BNPL iOS app as a solo developer → scaled it to <b>1M+ downloads and 300K MAU in the first year</b>.</li><li><b>Grew the iOS platform team from 1 → 13 engineers</b>, establishing CI/CD standards and code review processes to <b>support rapid product growth</b>.</li><li>Architected a UI testing workflow that allowed QA to automate regression tests, <b>reducing manual testing time by 70%</b>.</li><li>Transitioned the team from Git Flow to trunk-based development with feature flags, cutting <b>release preparation time from 4 days → 1 day</b>.</li><li>Developed an LLM-assisted data extraction pipeline to <b>automate team burnout analysis and capacity planning</b>, while <b>maintaining 99.5–100% crash-free rates for financial flows</b>.</li></ul><p><b>iOS Developer — Traffic Fines: 2018 — 2021</b></p><p><b>Traffic Fines App</b> — a platform enabling users to conveniently pay their fines.</p><ul style="list-style-type: none"><li>Refactored <b>critical payment &amp; fine lookup modules in a legacy app</b>, ensuring 99.7% crash-free sessions for <b>5M+ users</b>.</li><li><b>Established robust testing infrastructure</b> (Unit, UI, Snapshot), achieving high coverage for financial transaction flows.</li></ul></div> <div><div>▼ GLOBUS Ltd.</div><p>📍 <a href="#">Nizhny Novgorod, Russia</a></p><p><b>Junior iOS Developer: 2016 — 2017</b></p><ul style="list-style-type: none"><li>Developed and <b>shipped multiple iOS applications to the App Store</b> as a junior developer.</li></ul></div>	<div><div> <a href="#">cybermem.dev</a></div><div> Tel Aviv, Israel</div><div> <a href="mailto:mikhailkogan17@gmail.com">mikhailkogan17@gmail.com</a></div><div> <a href="https://linkedin.com/in/mikhail-kogan-platform">linkedin.com/in/mikhail-kogan-platform</a></div><div> <a href="https://github.com/mikhailkogan17">github.com/mikhailkogan17</a></div></div> <div><div><h3>Skills</h3><p><b>AI &amp; LLMs:</b> Agentic systems, LangChain, LangGraph, MCP, RAG, embeddings, tooling, OpenAI Whisper, Azure Speech.</p><p><b>AI Infra &amp; DevOps:</b> Docker, Kubernetes, Helm, Ansible, Traefik, IaC, Tailscale, AWS, Zero-Trust networking.</p><p><b>CI/CD &amp; Observability:</b> GitHub Actions, GitLab CI, Xcode Cloud, Fastlane, Prometheus, Grafana, Sentry, Firebase, Vector, Amplitude.</p><p><b>Languages &amp; Mobile:</b> TypeScript, Bash, Swift, SwiftUI, Python, modular architecture (DDD, feature flags, TBD flow), testing (Unit, Snapshot, E2E with Playwright/Pytest), SDK distribution (XCFramework).</p></div><div><h3>Personal Projects</h3><p><b>Hearly</b> — Built real-time speech pipeline combining Azure Speech STT with Whisper for higher-quality transcription for 2+ languages simultaneously (SwiftUI + iOS). Available in <a href="#">hearly.app</a>.</p><p><b>SoundPulseButton</b> — open-source SwiftUI button component with haptic and audio feedback, featuring pulse and ripple animations.</p><p>Listed on <a href="#">Swift Package Index</a> / <a href="#">GitHub</a>; also used in Hearly.</p></div><div><div><h3>Languages</h3><p>Russian (native), English (fluent)</p></div></div></div>

## Education

BSc in Computer Science & IT, Nizhny Novgorod State University: 2013 — 2017
